

Delta SubSea

12" Suction Pile Component Suite

The DSS Suction Pile Component Suite includes: Vent, Parking Receptacle, and Plug. The Vent and Plug are rated for 170psi. FATs are conducted at 150-155psi. The Vent and Parking receptacle are made primarily of high strength steel 12" pipe and coated per client requirements. Their heights are per client requirements with a minimum of 14" above anchor surface for the Vent and 11" for the Parking Receptacle. The Plug's metal components are all 316/316L stainless steel. The plug is approximately 54 lb in sea water.
