

Delta SubSea

Class 6/1 Torque Tool Adapter

Delta SubSea offers a API 170 Class 6/7 Torque Tool Adapter. The tool can be purchased with latching or non latching configurations. The tool is ideally suited for any subsea application requiring up to 25,000 ft-lbs torque. The tool requires no electrical or hydraulic interface freeing the ROV to leave it in place and perform other subsea operations.

Features

Input Interface:

- ▲ Class 4 male end effector (1.5" square drive)

Output Interface:

- ▲ Class 7 female end effector (3.5" square drive)
- ▲ Class 6 female end effector (2.625" square drive)
