

Delta SubSea

Hub Cleaning Tool

Delta SubSea has designed hub cleaning tools to match all the standard profiles and can also custom design to meet specific customer needs. Hub cleaning tools are used to remove fouling and marine growth from sealing surfaces on wellheads and jumper connections to ensure a clean and polished sealing surface giving the gasket its best chance of attaining a seal and reducing downtime and minimizing operational risks.

Specifications

Materials:

- ▲ Stainless steel
- ▲ Nickel-Aluminum-Bronze
- ▲ Delrin

Weight:

- ▲ 92lbs air

Dimensions:

- ▲ 24.5"W x 18"H
