

Delta SubSea

Paddle Valves

Delta SubSea offers ROV operable ball valve interfaces for the many subsea ball and directional control valves on the market. Construction is all stainless steel, has a 20yr design life and meets the API 17D and 17H specifications for ROV interfaces. The Paddle Valve as its often referred to eliminates the worry of an ROV manipulator damaging the valve stem causing the equipment to be returned to the surface for repair.

Specifications

Materials:

- ▲ Stainless Steel
- ▲ Depth Rating: Full Ocean Depth

Weight:

- ▲ 11lbs
