

Delta SubSea

17 H/D Hot Stabs & Receptacles

DSS manufactures and stocks a wide variety of API/ISO standard hot stabs and receptacles to meet client needs. Using the highest quality materials and a stringent quality program ensures our products perform in the harshest subsea environment. All products are accompanied by material certification of US manufacture as well as pressure test reports. Pressure ratings to 10,000 PSI on most models but can be designed to produce versions capable of higher pressure or higher flow. Stabs and manifolds conform to API 170 or API 17H (ISO 13628-8).

Specifications

- ▲ ROV friendly compliant handles are 316 SS
- ▲ Hot stab bodies are Nitronic 60
- ▲ Female receptacles are Nitronic 60
- ▲ Nose tips are Ni-Al-Brz
- ▲ Fittings and fasteners are 316 SS
- ▲ Water depth: 3,000m
