## Suction Pile Interface Stab

DSS currently offers an ROV friendly Suction Pile Interface Stab. Our robust design has an inflatable seal to overcome the common sealing problems often present in the irregular painted surfaces inside the stab interface of most suction piles. A port has been added, allowing for the easy installation of a differential pressure gauge which can significantly reduce your risk of damaging the suction pile. Each Suction Pile Interface Stab is rigorously tested onshore.

### **Specifications**

- ▲ 6061 - T6 Aluminum - Body / Handles
- ▲ Delrin - Nose Piece
- ▲ 316 Stainless Steel - Fittings
- ▲ Buna-N Rubber Bladder
